

THE WRANGELL SENTINEL

VOLUME 10, NUMBER 29.

WRANGELL, ALASKA, THURSDAY, JULY 25, 1912

\$2.50 PER YEAR, 10c. PER COPY

I-S. C. Commission Tries Humboldt Case

After the decision of the Supreme Court last April that the Interstate Commerce Commission had jurisdiction over Alaska transportation companies, the famous Humboldt case is again in the limelight before Hon. Edgar E. Clarke, member of the Commission of Washington, D. C., in a hearing at Skagway which started Friday.

Wrangell in Darkness Monday and Tuesday

A plentiful touch of one feature of "them happy days" was given Wrangell Monday and Tuesday night when all commercial or dwelling houses were forced to burn oil lamps or the "tallow dip" on account of repairs to the Electric Light and Power Company's steam boiler.

Arctic Flowers.
Among the flowers of the arctic regions there are 782 varieties, which are either white or yellow or both.

Hanford Gives Up.

Federal judge C. H. Hanford, wired his resignation of office to the President Tuesday declaring he was unable to withstand further strain of investigation of the charges of Congressman Berger.

Spokane Friday.

The Alaska Cruise Steamer, Spokane, will be in at the usual hour Friday with a full list of tourists. Theodore Richardson, the famous "Alaska Artist" is making the trip on the Spokane but an Exchange states that he will stop in Sitka this summer instead of making his usual visit to Wrangell.

Mrs. Adolph Engstrom Died This Morning

Mrs. Adolph Engstrom, wife of one of Wrangell's prospering merchants, died at her home at eight o'clock this morning.

Fatal Shooting Monday Night.

Drink crazed red light denizen shoots. One man dead one injured.

John E. Anderson, of San Francisco, who had recently come to Wrangell, is dead and buried. Knute Anderson, a companion is suffering from a bullet in the foot and Irene Taylor the culprit is in jail under charge of murder as the result of a fatal shooting on the "wharf" last Monday night. The shooting followed a dispute over pay for drinks.

Tuesday morning, a Coroner's Inquest was held over the body of Anderson and in the afternoon the culprit was brought up in the Commissioner's Court and was held to answer a murder charge at the next session of the Grand Jury.

J. E. Anderson, the victim, was buried Wednesday and, leaves a family of five children and a wife whom is believed to be enroute to Wrangell expecting to join her husband here.

Motor Boat Club Enjoys Picnic

Nearly every member of the Motor Boat Club, many of their friends and the band-boys attended the Club Picnic at Pat's Creek last Sunday. Of the eight boats, the Aleris, Gray and Red Streaks, Etolin, Poor Farmer, Black Fox, Dentist and Secret, all had minor troubles except the Secret, which tended to make the trip eventful.

The fishing was not up to expectations as the creek was very low and the only good fish caught were by F. Johnson, M. Katzenmeyer and the Ed who braved the mosquito army at the head of the lake.

Chichagoff Pass contributed its frequent high rollers on the return trip making the way of the speed boat quite "wuff". However, everyone reached Wrangell in the course of time, all agree that the first event of the Motor Boat Club was a success.

The Beloved Dead.
Oh, for the touch of a vanished hand and the sound of a voice that is still—Tennyson.

Kalkins Building

A. J. Kalkins has recently started the foundation of a 26 x 40 building on Front Street between Engstrom's and Scott's Chop House. The building is to be used for commercial or restaurant purposes.

Removes Bullet

Dr. Dawes last evening removed the bullet from the foot of Knute Anderson, who was injured in Monday night's shooting.

St. Phillips Church

"Being Alone" will be the theme of the address at St. Phillips Church next Sunday evening, July 28.

An exchange asks: "What would you do if every time you put your hand in your pocket you found a \$10 gold piece?" We don't know just what we'd do, but we'd be thoroughly convinced that we had another man's pants on.

HATS HATS HATS

The Latest and Largest Line of Summer Hats for Ladies, Gentlemen or Children are now being displayed in our windows. They consist of straws, silk and cotton crashes, white ducks and felts. The most particular person will be able to find a fit in this large assortment.

Jake Johnson Passed Away.

Jake Johnson, one of the old natives of Wrangell, died Sunday morning at his home after short illness following injuries received by a fall. Johnson was about 70 years of age and had gathered quite a collection of property during his residence in Wrangell. The funeral services were held Tuesday afternoon.

Did You Know That--?

Two French military aeroplanes recently collided in midair killing both pilots and wrecking the machines. This is said to be the first accident of its kind.

On an average, Miss Louise Lester, the only lady on the Currency Destruction Committee, throws away \$3,000,000 daily in damaged paper money.

The recent scarehead about an attack on the President's life was a practical joke on a club reporter.

The Marie, the purse seiner that called on Monday evening on her way from the Sound to Point Ellis, Alaska, is one of the largest of its kind.

Over 50,000 gross tons of sailing vessels, equivalent to the total built in the last three years, was lost at sea during the year.

Calcium Cyanide and Brilliant-shine Metal Polish cannot now be carried by passenger vessels.

Angelo's Verdict.

Once a painter notorious for plagiarisms executed a historical picture in which every figure of importance was copied from some other artist, so that very little remained to himself. It was shown to Michael Angelo by a friend, who begged his opinion of it. "Excellent," said Angelo, "only at the day of judgment, when all bodies will resume their own image again, I do not know what will become of that historical painting, for there will be nothing left of it."

Incongruous.

A clerical correspondent of one of the London church papers relates that a certain prelate had great difficulty in suppressing his laughter at the consecration of a church the other day owing to the device on one of the screen banners which were carried in the procession before the service. This banner was adorned with a very fierce looking lion with terrible claws and teeth, while underneath him was the legend: "Suffer little children to come unto me."

ROBERT W. JENNINGS

OF JUNEAU

Nominated by the Democrats as Candidate for
Delegato From Alaska

REPUBLICANS—SOCIALISTS

"I would say to my Republican friends: Let us not quarrel about National politics; let us talk about Alaska. It cannot be denied that Alaska has been hard hit by the leaders of your party; they have bottled up your coal; they have put nearly all land in Southeastern Alaska in a Forest Reserve; they have pandered to the special interests; they have overrun the land with special agents; they have denied us a local Legislature. Alaska has not thriven as it should have done. The two factions of your party have devoted more time to their own quarrels than they have to the welfare of Alaska. We have had too much of the Wickersham-Shackelford feud. Senator Knute Nelson says that Wickersham is the worst man that Alaska could send to Congress, because he quarrels with everybody and opposes everything which he himself does not originate. Gilford Pinchot says just the opposite. I am not going to say which is right, but my friend, don't you think you ought to have a change? As an Alaskan, not as a Democrat, not as a Republican, not as an Office Holder, not as an Office Seeker, but as an Alaskan sincerely interested in Alaska receiving all the consideration to which she is entitled: is it not time to put a stop to the Wickersham-Shackelford feud? Is it not time to say to these gladiators, 'A plague on both your houses, we will try somebody else?'"

And rather will I say to my Socialist friend (and some of the warmest friends I have are Socialists) let us not talk of world-wide matters. It is Alaska that interests us now. You live in Alaska. You are interested in her welfare. Alaska is cold and hungry; she needs things; she needs them now, not twenty years from now. If a Socialist should be elected from Alaska now, could he put your theories into force? No. But, you say, 'it will help the cause.' Let that be granted for the sake of argument, what are you going to do, what is Alaska going to do while the cause is being helped? STOP—LOOK—LISTEN, would you rather get something within your reach than reach for something you cannot get?—(Speech of R. W. Jennings at Valdez, April 1912.)

"The Home of the Fishermen"

IN THE WORLD OF SPORT

Lord of Chicago Is Best
Third Baseman.

Photo by American Press Association

Harry Lord of the Chicago Americans is once more proving he is the best third sacker in the game today. Lord covers more ground than any last stationer that has handled the position in the last few years. Besides being a great fielder, Harry is some base runner and a 300 batter.

Referee Should Be Outside the Ring.

A controversy as to whether the referee's position should be in or out side the ring is just now agitating English boxing circles. The question is only part of a movement aimed at some widespread reforms. An effort is being made to promulgate an international scale of weights that will be recognized in all countries where boxing is held.

The leading authorities on boxing have given their views for publication. All are in unison regarding the uniform weight scale, but differ on the referee problem. Some declare that the referee is a nuisance in the ring, obstructing the view of the spectators and getting in the way of the boxers. Those taking the opposite side point out that when the referee is outside the ropes he is unable to see a foul blow struck if the recipient happens to have his back turned on him.

Eugene Corri, who is recognized as England's leading referee, favors the American system of refereeing. Gilbert Elliott, chairman of the National Sporting club of London, takes the opposite point of view. Victor Brerer, the French promoter, when asked to give his opinion said he favored the plan of having three judges outside the ropes to give the decision and a ringmaster inside to see that men box fairly.

Browns Have New Pitcher.

A new pitcher has been captured by the St. Louis Browns. He is a collegian, Right Hander Adams, and hails from Albright college of Myerstown Pa. Adams was discovered by Professor Charles S. Keldner, one of Colonel Hedges' unknown scouts in the east.

Adams' fame was gained a few weeks ago, when he pitched two games in one day, morning and afternoon, and accomplished the feat of striking out thirty-two batters, sixteen per show.

Keldner is the one who picked up First Baseman Ed Miller. If Adams is as worthy as his namesake "Eabe" of the Pirates, and can whiff sixteen every time he pitches, then the Browns have the wonder of wonders.

Sounds So Much Better.

Visitor: Never say die!
Boston Boy: I commonly refer to the dissolution of the vital forces.—Judge.

He Wouldn't Advertise.

There was a man who hustled not—
To luck he trusted;
He would not advertise a dot—
And so he rusted.
And likewise busted.

SMELTER FUMES UTILIZED.

Manufacture of Acid Phosphate Cheapened Through Use of Gases.

The revival of agriculture in the south owes much to the natural deposits of phosphate, which are found in Florida, South Carolina and Tennessee. Experiments have shown that raw rock phosphate will stimulate plant growth, but the process is slow, and the fertilizing element may be made available more quickly by treating the rock with sulphuric acid.

On this account the successful manufacture of fertilizer from rock phosphate depends in great measure on a cheap source of sulphuric acid. A plentiful and cheap supply of sulphuric acid means a cheaper and a more readily available supply of fertilizers. The greatest demand for sulphuric acid is in the fertilizer industry, the greatest supply of raw materials for this industry is found in the southern states, and the greatest demand for fertilizers also exists in this same section. Few industries, therefore, are of more importance to the south than the manufacture of sulphuric acid.

The sulphuric acid plants at Bucktown, Tenn., were installed with the purpose of disposing of the objectionable fumes from the large smelters of the copper companies at that place. According to F. R. Laney of the United States geological survey, who describes these plants in an advance chapter from "Mineral Resources of the United States For 1911," they have been very successful. They use what was, until their establishment, not only wholly a waste product of the smelters but also a menace to all the adjacent country. These acid plants have therefore produced at least three desirable results by furnishing a large supply of acid where it is most needed, by rendering valuable large supplies of sulphur hitherto worthless and by relieving the region of the nuisance of the smelter fumes, thus making it possible to continue operating the mines and at the same time to cultivate the surrounding lands.

High Cost Of Living Shows Effect in Alaska

Local butcher brings meat down temporarily but friends interfere.

The much discussed high cost of living which has, heretofore, had little effect on Alaskans, made itself distinctly felt in Wrangell Tuesday afternoon when Mr. Cory, former bookkeeper of the Point Ward Packing Company differed with J. J. McTague, proprietor of the Wrangell Meat Market, over the price of meat. During the discussion for a downward revision of the tariff, the bookkeeper offered assertions not commending the butchers honesty whereupon the butcher immediately, without reference to Queensbury or "Schedule K", with a right hook to the jaw lowered the customers meat. Prompt interference by friends prevented further demonstrations.

NEW TYPE OF DAVIT.

Apparatus For Launching Lifeboats
From a Ship's Deck.

The Martin davit for launching life-
boats at sea is simple, speedy and safe.
The arrangement is such that one man
can swing out and safely launch a fully
loaded boat in less than two minutes.

The davit arms are mounted on cam
shaped tracks and are actuated by the
turning of a crank which sets in motion
a simple worm gear acting on a shaft
connecting both arms of the ap-
paratus. By this means the lifeboat is
swung to the outboard position and is
then lowered as quickly or as slowly
as may be desired under the perfect
control of a strong hand brake.

The Martin davit does away entirely
with the manifold dangers arising from

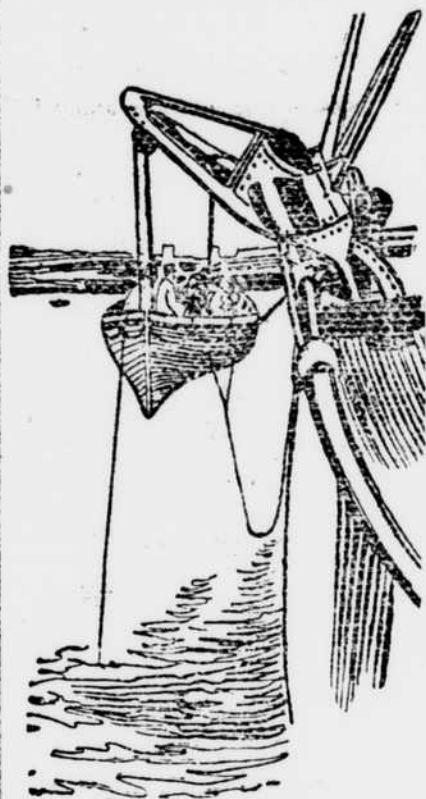

THE MARTIN DAVIT

the use of manila rope as falls, being
equipped with galvanized wire, special-
ly woven for the purpose.

The dangers attending the use of ma-
nila rope falls have long been apparent
to seamen, and where possible manila
rope has been superseded in the rig-
ging, and even mooring and towing
hawesers are now commonly made of
steel wire. The chief danger in using
manila rope for lifeboat falls lies in
the fact that when wet the ropes swell
and are very apt to jam in the sheaves,
making it almost impossible, if not al-
together impossible, to lower the boat.
In addition to this, they often become
frozen, in which condition they are
about as pliable as a bar of iron.

All bearings are self lubricating, so
that the davit can always be operated,
even in cases where it has been neg-
lected by those appointed to look after
it. The working parts of the davit
are inclosed in a water tight casing.

SCIENTIFIC AMERICAN N.Y.

LOWERING THE BOAT.

which prevents snow or ice from inter-
fering with its efficiency. The con-
struction is of angle or structural steel,
such as that used in bridge work or
where the strain to be withstood is ex-
cessive.

With the Martin davit one man alone
can launch the largest lifeboat fully
loaded and at all times have both ends
of the boat under perfect control. He
is not hampered by coils of manila
rope which must be kept clear and free
from knots and kinks, and even with
the vessel listed heavily he is still able
to outboard his boat, which is impos-
sible with the old type of davit. The
falls being wound on a drum, the
operation of which is controlled by a
brake, they are at all times under per-
fect control, which eliminates the dan-
ger of one end of the lifeboat dropping
and throwing out the passengers, an
accident which frequently happens
when the boat is being lowered by
manila ropes in the hands of a seaman.

"AMERICA'S FINEST FLOURING MILLS"

**Costs more PER
SACK**
**Costs less PER
LOAF**

AUTHORITIES concede that the FISHER
FLOURING MILLS COMPANY has the most per-
fectly constructed, best arranged and modern
equipped plant ever built in this country. It employs
only the most experienced millers and uses selected
Eastern Hard Wheat and choice Western Soft Wheat
in producing

FISHER'S BLEND FLOUR

Naturally, it costs more to turn out this new, high-grade blend than
it does to make simpler and less carefully handled flours. Hence,
its price per sack is slightly more. Inasmuch as it is not flour
but loaves of bread that we eat, and as Fisher's Blend makes
more loaves, in proportion to its cost, than does any other
flour, housewives and others using it have the satisfaction
of knowing that they are really getting more and better
values for their money. Fisher's Blend costs more
as flour, but it gives more, both in quantity
and quality of loaves, and is therefore
actually more economical to buy
and use than are the
cheaper brands.
